

Our bio-masks Protectiv® by Dediemme :

- ✓ **Real alternative to fight against the pollution of disposable masks;**
- ✓ **In line with new recommendations for protection against COVID-19 variants.**

Faced with the circulation of new variants of COVID-19, the High Council of Public Health recommends abandoning « home-made » textile masks and protecting oneself by using category 1 protective masks/

Protectiv® by Dediemme masks, equipped with high-performance rechargeable filters certified UNS 1 by the DGA* and CERTAM**, are fully adapted to these new recommendations.

Ecological masks, a real alternative to fight against the pollution of disposable masks :

- ✓ Infinitely usable, dishwasher-safe.
- ✓ 100% recyclable
- ✓ 370 times less polluting than a single-use mask.
- ✓ Made of French bio-plastic, a totally recyclable material obtained from castor oil. No oil is used.

Eco-designed and made in France

Masks & filters Protectiv® are for sale on
<https://protectiv.dediemme.com/en>.

- ✓ Masks sold with a pack of filters for 200 uses. Available in several sizes and colors.
- ✓ Filters available for sales <https://protectiv.dedienne.com/en>.

Protectiv® masks are also pleasant to wear and use:

- ✓ Flexible and ultra-light, they fit the morphology of each face thanks to thermoforming.
- ✓ They are perfectly suited to the most sensitive skins.
- ✓ Absence of mist on the glasses.

About security, the small rosette-shaped filter holder limits discharges and thus the spread of viruses.

**DGA : Directorate General of armament*

***CERTAM : Body designated as a competent third party by the Direction Générale des Entreprises for the evaluation of masks for the general public..*

About Dedienne Multiplasturgy® Group :

Founded in 1947, Dedienne Multiplasturgy® Group offers innovative and technological solutions for the production of complex parts based on high-performance plastic and/or composite materials to equipment manufacturers, constructors and designers.
